

As BCIT grows we become less aware of one another's activities.

Together we are involved in an enterprise in which we may take some pride.

I hope that you will take every opportunity to let The Editor know (by a call or by a note) of "developments" in your sphere, so that we may keep current, and retain our sense of community. D. Goard

Display promotes BCIT

A donated booth at the Western Construction Material and Equipment Show at the PNE in November, manned by Building Tech students, promoted employment opportunities for graduates in Engineering and Business Technology.

The display was used also in October at the B.C.-Washington State A/V Conference.

New Manpower counsellor on the scene

DICK RUTTAN, following three years' experience in Manpower covering a wide range of occupations, including engineering and managerial, is looking forward to his new duties here.

MARTY WINKELAAR, transferred from this office to the new CMC office in Richmond, writes in leaving -

"Twenty months ago I joined the academic community at BCIT full of anxiety as to how I would be accepted and determination to beat all odds and assist positively the students on campus.

What a pleasure it has been from that first day, working with the administrative staff, the academic staff and the students.

It's hard to believe that over 4000 people can work so harmoniously and allow a newcomer to feel as part of the 'gang'.

There have been times when the cooperation and assistance given has been overwhelming. It is no wonder BCIT has the good reputation that abides with it - your school deserves it.

I am leaving with mixed feeling. However I do feel I have made some small contributions to the school which I hope will endure and benefit all involved. I also feel there are others in our organization who can and should be given the opportunity to see an effective 'community' in action and contribute to it in a meaningful fashion. With this idea in mind I feel my function on campus is complete and that further benefit can be accrued by my activities off campus.

I would like to thank you, Mr. Goard, and your staff for an interesting, challenging and meaningful sojourn in my career. I fully intend to maintain a close contact with BCIT and who knows someday I may be back (with or without parking privileges.)" MJW.

Enrolment exceeds seating —

Total enrolment this fall of 2,903 students is reported by Registrar J.T. FIELD. Last year registrations totalled 2,850.

Just under 3,800 applications were made for the 1,600 seats this year.

Wish to order a book?

It is now possible for the teaching faculty to order books for their personal use through the Library Ordering Dept. Please check with Gerry Weeks, Ass't. Librarian for details on book purchases. 362.

TOTEM CIRCLE TOURS, a multimedia tourist promotional show to be on at BCIT, Jan. 19, 1972 by the B.C. Ferry Service. Showings will start at 12 noon-26 min. long. It's a good chance to see some real A/V.

' Programme sponsored by Traffic and Transportation Mgt. Option, B.C.I.T.

Thinking of taking a leave out of the future?

Educational Leave policy detailed

Approved by the Civil Service Commission in 1969, the policy on educational leave from BCIT in effect recognizes two types of leave, subject to different guide lines.

EDUCATIONAL LEAVE OF ABSENCE WITH PAY may be granted by the Department of Education on the recommendation of the Principal to members of the teaching faculty - provided ...the member has been an employee of BCIT for at least five years

...the member has applied in writing to the Principal at least 12 months prior to the beginning of the year in which he plans to start his leave.

...a suitable substitute can be found

...Leave will normally be for a period not exceeding 12 months

...The purpose will normally be for academic pursuits or approved specialized experience

Salary paid while on leave will normally be 50% of his normal salary

A member will become eligible for a leave after each five years of service thereafter.

In new and rapidly growing fields, these periods may be reduced and the salary allowance varied at the discretion of the principal.

Two such leaves per year have been approved by the Department of Education.

An extended LEAVE OF ABSENCE WITHOUT PAY to members of the teaching faculty may be granted by the principle - provided -

...the member has applied in writing to the Principal at least six months prior to the beginning of the school year in which he plans to start his leave

...a suitable substitute can be found

The leave will normally be for a period not exceeding 12 months

The purpose of the leave will normally be for academic pursuits or approved industrial experience

Leave of absence when granted will be without prejudice to the right of the normal salary increment.

About six such leaves are being granted yearly.

News Briefs

P. CORLEY-SMITH has joined the English department, and MRS. J.A. ANTHONY replaces Mrs. H. Groves, Med.Lab, resigned.

K. HARTLEY, appointed instructor, Technical Management, has agreed to coach the basketball team.

Mr. Goard has heartily encouraged staff participation in student social events.

A cordial invitation has gone out from the Student Executive to the re-opened SAC Cabaret on Friday nights.

Friday nights, also, the gym is reserved for staff and their families.

Ed. Media visitors here

One of the top Educational Media people in the field was a visitor here in October following the conference of the International Council of Educational Media in Montreal, along with four other delegates on a post-conference tour.

William J. Quinley of Florida State U., formerly National Chairman of the DAVI of NEA Coordinating Committee, Library and A/V, along with C.O. Bergeson, State U., N.Y. Dept. of Education and Communication, R.B. McLuskie, Director of the Scottish Film Council, A. J. Maclay, Associate of the S.F.C. and W.P.Orr, Film Consultant, London, with Jan Clemson, representative of the National Film Board, toured our facilities and informal discussions followed.

The tour was arranged by DOUG HORAN.

E.C. Crossin reviews

Special Study #14, "Background study for the Science Council of Canada" by J.H.G. Smith and J.L.G. Lessard, 1970 - in The Forestry Chronicle SD1 F62 October, 1971.

"Greetings" from Cambridge

... A. Kshatriya writes

I am doing my own "thing" in the department of metallurgy and materials science at the university. The department is in the process of occupying new buildings with the usual problems of one part of the equipment being in the old buildings, another one in the new. I have so far found the people at the university quite outstanding and helpful. Service aspect of London, Cambridge leaves a lot to be desired. The pace of life is a strange mixture of a restless and casual attitude. It is refreshing, however, to note the pace of life is slow and laws of nature even cannot interfere with morning and afternoon tea breaks!

I propose to work with Titanium-Aluminum and Vanadium alloy to examine microstructure and crack propagation. I shall be using a large amount of equipment. This should satisfy my obsession for Mat-Sci Techniques.

I attended relevant conferences in London and Liverpool. They provided me with an instant introduction to the language of Mat-Science and equipment, etc. They were quite helpful.

I am visiting as many institutions of higher education as possible. So far I have visited the University of Liverpool, Imperial College, London to get their views on interaction with local tech institutes, industry and the tax-payer! Maybe handy for the Academic Standards Committee-type work.

Drop in and see us here if you are "passing by". Phone 1223-64360 between now and August 15, 1972 (?). Cheers..

AK
