

Status quo "unlikely", says Hagen

Link Staff Report

BCIT is currently undergoing an external program audit that may recommend BCIT become what Minister of Advanced Education and Job Training Stan Hagen terms a "leaner and meaner" institution.

Hagen addressed a crowd of between 1000 and 1200 staff and students gathered in the gymnasium last Thursday morning to hear him explain the purpose of the audit. He said the government wants BCIT to be efficient and effective and to be "the best in Canada...that may mean a leaner, meaner institution."

He said the program audit is designed to review the "fuzzy edges" around the programs at BCIT. "There is need to refocus the entire BCIT philosophy."

"Perhaps there are some

current focus of BCIT to one more in line with an expanded vision of the economic future of the province.

- Attempt to define for the Institute a place within the educational spectrum that would clearly differentiate its role from that of colleges and universities.

- Assess and recommend on the desirability of giving BCIT degree granting status.

At the end of his prepared address, Hagen answered questions from the floor from students, faculty and staff, alumni and industry.

Student Association president Jamie Letwin told Hagen that if the audit was going to make BCIT the best institute of its kind in Canada and a world class institution, then he was "very excited about that."

"It's a positive direction and it's going to do a lot for us. Our main concern is that students are protected, with students knowing right now that their courses won't be cut in the middle."

Hagen answered that there wouldn't be any disruption of that type unless a program was moved to another institute that was very close.

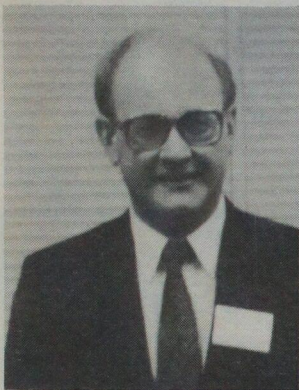

Dean Mikaloukas, another member of the student executive, said the Student Association knows BCIT is in a rut, and fully supports the changes that will be made. However, he asked Hagen to ensure that there was "some sort of participatory process so that we can have some say in the decisions that are made about this institution."

Hagen said he was not against input but that he "could not negotiate with the student society on the direction the Institute should go...we value your input a great deal...but the decision will be made by the board of this institution." He added that it "will also, in all honesty, be a suggested direction from me."

The president of the Staff Society which represents faculty and technical staff at BCIT, told Hagen that the institute has been through a "tremendous period of change over the past two or three years, perhaps more so than any other post secondary institution in the province." Mark Angelo told Hagen that at some point a "period of stability" would be welcomed by the

A wide cross-section of students and staff showed up to hear Stan Hagen explain the purpose of the program audit of BCIT.

Link File Photo

Stan Hagen

programs that should not be offered here at BCIT, and on the other hand, perhaps there are some that should form part of the profile at BCIT," said Hagen. He added that there were three possibilities, BCIT could expand, stay the same, or become a "tighter" institution.

"In all honesty I must say that the status quo is highly unlikely."

The audit, being conducted by consultant David Park, was announced on August 12th by BCIT President Roy Murray, who in a letter to BCIT employees said it represented a positive step for BCIT. "We have an opportunity to create an institution for trades and technology which will continue to gain strong national and international recognition."

Hagen said the government had given Mr. Park a very broad mandate. "We've not given him any specific instructions to look at this area or that area," said Hagen. "We haven't given him any directions and there is no hidden agenda to this process. It's an honest attempt on my part to make sure BCIT is doing what the government and the people of this province think it should be doing."

Hagen added that it may well be that as a result of the audit, the case is made that there needs to be more money spent at BCIT. "As a government, we have to know the justification for those funds. It has to be based on direction." He said the audit would result in a focus for BCIT so that the government could leave the Institute alone and give staff the "stability I know you want."

This government did give the consultant four terms of reference for his report, due on Hagen's desk on October 19th. Park is to:

- Assess the relevance of every program or program grouping offered within the current program profile.
- Indicate possible deletions from the profile or enrollment reductions that would change the

World Culinary Art Show

BCIT instructors and students participated in the first world culinary arts festival held at the new World Trade and Convention Centre in Vancouver, July 9 - 12, 1987. It was also the first event ever held in the centre.

There were over 1500 chefs competing in this prestigious event. The 14 teams were Canada, USA, Germany, Switzerland, Holland, Japan, China, Australia, Austria, Singapore, New Zealand, Luxembourg, Britain and Finland. 32 Corporate Teams from those countries also competed together with 300 individual entries and 18 student teams.

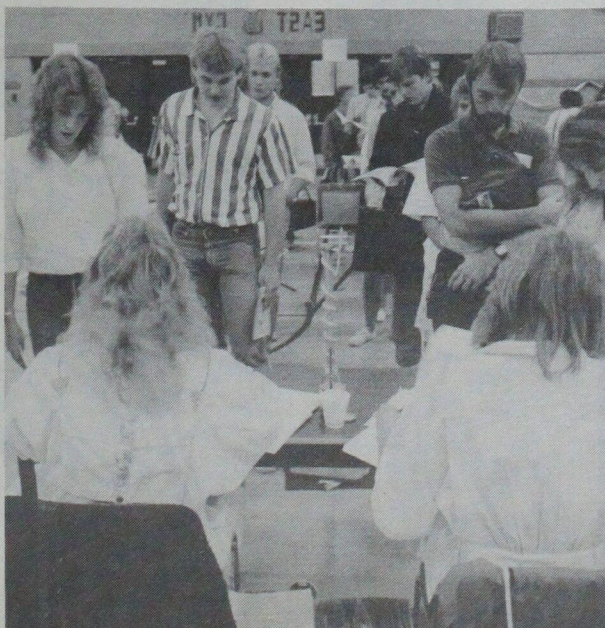

The BCIT Corporate (Instructors) Team picked up three Silver, three Bronze and two Honourable Mentions in the Cold Event. Seven instructors also achieved awards in the individual category ranging from Gold to Honourable Mentions.

The students kept pace with

their instructors by bringing in a Bronze for their team in the Hot Event as well as a Gold, two Bronze and three Honourable Mentions in the Cold Competition. Marie Lister, an alumnus student, made a four foot high dragon sculpture as a centerpiece for the Instructors' Team.

This event is used as a warm-up for the World Culinary Olympics which is held every four years (next 1988) in Frankfurt, West Germany. Teams spend months preparing show pieces and designing hot foods. Most teams or individuals spend weeks just prior to the show putting garnishes and show pieces together.

The overall winner at the National level was Singapore, Canada second, USA and Switzerland, third and fourth respectively.

Registration and orientation - lots of line ups but everything went smoothly.

Tracking cystic fibrosis gene

By Hugh Westrup

A Toronto researcher has moved several steps closer to finding the gene that causes the hereditary disease cystic fibrosis.

Dr. Manuel Buchwald, a geneticist at Toronto's Hospital for Sick Children, predicts that the exact identity of the gene will be discovered in the next one to five years.

Being able to find the cystic fibrosis gene will mean that doctors can provide "genetic counselling" to prospective parents who think they may have the faulty gene. Identification of the gene will also help doctors

diagnose the disease earlier, which would allow earlier treatment.

Dr. Buchwald says finding the gene is extremely difficult because scientists don't know what they're searching for. "It's like looking for a house in a city without knowing the street address," he says.

But with the help of a special tool, called a molecular probe, he now knows which "neighbourhood" the gene resides in—the approximate location of the cystic fibrosis gene on a human chromosome. (Chromosomes, long 'strings' of genes, are found in every cell of the body.)

Molecular probes are pieces of DNA. When a molecular probe is exposed to a human chromosome, it will stick to a certain place on the chromosome, like a bird homing in on its nest.

In a painstaking process of trial and error, Dr. Buchwald experimented with more than 50 different molecular probes, testing one probe at a time on chromosome samples from more than 100 cystic fibrosis patients and their relatives.

He was able to locate the "neighbourhood" of the cystic fibrosis gene by finding the molecular probe which seemed to behave in a similar way with most of the subjects he studied, and by seeing where it stuck to the chromosome.

The successful probe will now be used in attempts to develop new and better probes that scientists hope will guide them ever closer, and finally, right to the cystic fibrosis gene.

Dr. Buchwald says that cystic fibrosis is one of the most common hereditary diseases and strikes about one in 2,000 people. Scientists estimate that one in every 20 people carries the cystic fibrosis gene; but the disease appears only in children whose parents *both* carry the gene.

Cystic fibrosis causes malfunction of secretory glands in the lungs, digestive tract, reproductive tract, sweat glands and mouth. The lungs produce a thick, sticky mucus which clogs the airways and leaves the vic-

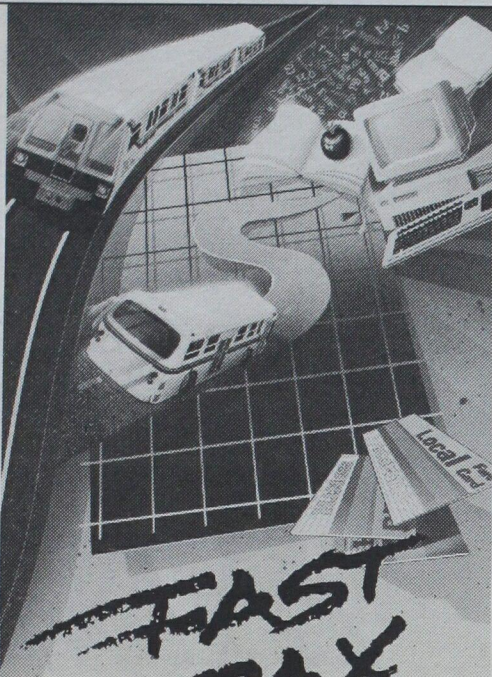

tim susceptible to chronic lung infections. Mucus also plugs the pancreas, preventing the digestive system from absorbing enough fat from the diet.

The subjects in Dr. Buchwald's study came from 50 Canadian families, each of which had at least two members afflicted with cystic fibro-

sis. Clinics took blood cell samples from each subject and sent them to Dr. Buchwald in Toronto.

Dr. Buchwald was assisted by Dr. Lap-Chee Tsui. Funding for the research was provided by the Canadian Cystic Fibrosis Foundation.

For the Roads

to Higher Education

Attention all post-secondary students! Before you open a textbook this term, study the benefits of fast, affordable transit to and from school. FAST TRAX, the post-secondary student's transit guide, will be available on campus this fall. Pick one up for complete information on routes serving your college or university, how they connect with the rest of the system, and how you can save time and money with prepaid fares. Watch for details on posters and in the September 11 edition of The Buzzer.

Opposition not buying it

Victoria — New Democrat universities and colleges critic Darlene Marzari says at best the B.C. government is mismanaging its post-secondary institutions, and at worst is driving B.C. residents to other provinces for their education.

Mazari made the comments in the wake of recent news stories that more than 2,000 B.C. residents have been turned away from some provincial colleges and universities.

"This year the government has given a cursory increase to the student aid program, and is expecting that to be some kind of blanket cure-all for years of post-secondary funding cuts," said Marzari (Vancouver-Point Grey).

"A small boost in student loans isn't going to get a student an education if the courses required aren't available."

Marzari says B.C.'s young

people are only guilty of following the government's advice.

"The government has been promoting our colleges as a way of gaining practical education and experience. Yet the funding cuts they've implemented over the past few years have made it impossible for the colleges to meet the increased expectations.

"The result is that many of this province's young people will have to start looking outside B.C. to get the education they need."

Marzari adds at a time when unemployment is so high in B.C., the government should be putting more money into post-secondary institutions and encouraging advanced education, not discouraging it.

"There are a lot of people out there who can't find a job and

are looking to our colleges as a way of improving their futures and getting a career. But this government is essentially slamming the door on those hopes for a better future.

"B.C. has the lowest post-secondary funding per capita in all of Canada, and a token increase to the student aid program isn't going to make that better.

"What is needed is a major increase in post-secondary spending so we can increase faculty sizes and expand programs, and make B.C. a desirable place to receive an education.

Hagen continued

written by the advisory committee and industry, have "never been acknowledged by our own administration, so how can I accept that Mr. Park is going to do any more of a job than we can in self evaluation, when we've been in a technological development industry all of our lives.

Hagen said Caldwell's statement was the best reason he'd heard for being at BCIT that day. He said he did want to hear from the "people in the trenches. You're the people who are dealing with the subject everyday." He asked Caldwell to submit copies of any reports he had available.

John Leech, president of the Alumni Association, said graduates have been concerned about BCIT's program profile over the past few years, but, he said, if the audit produces "clear direction and focus for BCIT, it will have been worth it." He said

BCIT's alumni want more talk about quality and excellence over quantity.

Leech also said alumni feel high technology at BCIT must be funded and that money be available to purchase capital equipment. "We can't go on continually with high technology in all areas, without the proper infusion of dollars for capital equipment," said Leech.

Park, as a one man task force, is being assisted by a three member secretariat made up of Bob Elton of Price Waterhouse, representing the Minister, Greg Coyle of the Premier's office, and Vice President of Education Drug Svetic representing BCIT. The final report, due October 19th, may or may not be released to the public, says Hagen. "I haven't discussed that with Mr. Park because I don't want to deter him from saying things that have to be said," said Hagen.

Getting through Shinerama day

It's SHINING time again! That's right, time for hundreds, possibly millions of eager students from BCIT to descend on unsuspecting Vancouver area citizens. Armed with polish, buffing cloths and donation cans, these students will be ready to shine the shoes and take the money of all passers-by.

However, some of you who plan to participate may be somewhat unfamiliar with the fine art of "getting the job done" once you've staked your street corner. The Link offers the following helpful hints.

1. SHINE THE PERSON'S SHOES ONLY AS A LAST RESORT! First try to get his or her wallet, empty it and then replace it while the subject is looking for directions

2. If this indirect approach to fund raising is not possible, or one member of your shining group is arrested, confront prospective donors directly and threaten them with the curses of your ancient ancestors who will haunt them while they are alone in their bathtubs.

3. If the prospective donors are still not dishing out any cash, get down on your knees and whimper and cry hysterically. This will embarrass most people sufficiently that they will throw some

change your way.

4. However, if the person insists on a shoe-shine while you're on your knees, sigh with great resignation and reach for your shining kit.

5. To make it more worth your while, step on the shinee's shoes and scuff them up. This will ensure that they will be impressed with the terrific job you might do.

6. If your shinee still hasn't wisely changed his or her mind, choose your polish. Being supplied only with army surplus black and flaming red makes the choice easy, all you have to do is flip a coin.

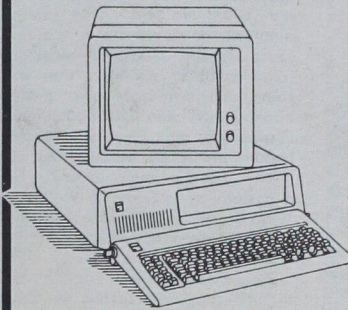

7. Now apply the polish with caressing strokes, gently something it into the tiny creases of the supple leather, vinyl, or otherwise unidentified material.

8. Once the maximum amount of polish has been transferred from your fingers to the shoes, socks and pant cuffs of the shinee, attack with your brush while doing a Maori war dance around the shinee.

9. As you fall to the ground exhausted, remember to hold your tin can out beseechingly to the shinee, and then listen to the gratifying sound of money falling into the can.

10. Stand up, and start from step one again.

Stability welcome

The crowd was large (about 1000 staff and students), but the atmosphere was relaxed and no one spoke out of turn...a far cry from the last time staff and students got together to hear about pending changes at BCIT. In 1985 it was massive cutbacks that brought students and staff together to defend services and programs under the knife. This time around, the process is much more civilized and perhaps even welcomed by many in order to (hopefully) settle for some time to come just what BCIT is all about.

When the Honourable Stan Hagen addressed the comfortably seated crowd in the gymnasium last week, he shared his view that BCIT should be the leader in delivering technology and trades education in B.C. Although he left definitions to his one person task force, he received support for the idea that BCIT should be a center of advanced technology education from students, alumni, industry and staff.

However, as was pointed out by a long-time member of BCIT's faculty, the institute's instructors, advisory committees and industry have always recognized BCIT's leadership role in technology-related education, advanced and

otherwise. It's just that the administration and government have failed to appreciate this reality, either with appropriate funding or in the way technology programs are placed within the post secondary system in B.C.

Hagen seemed interested in addressing these and other concerns, although he wouldn't commit himself on anything until consultant David Park had submitted his final report, in about four weeks time. He did promise, however to act quickly once the report was in, so that all staff and faculty could finally look forward to some stability at BCIT.

Let's hope so, BCIT has been through enough over the past four or five years.

Welcome from the campus IVCF

On behalf of the Inter-Varsity Christian Fellowship chapter at BCIT I would like to welcome those who have just started here at BCIT and those second years that are returning to hit the books again.

To introduce myself, my name is Cameron Robinson. This year I will be finishing my second year at BCIT in the Civil and Structural Technology. Ask around for me in the area of room 386 in the AI building. I would be glad to talk to you.

I am sure that all are looking ahead to assignments, mid-terms, finals and hours of study. We invite you to not only learn how to pass tests but to learn how to think for yourselves - to fit things together and work things out. There is much more to life than to find the first derivative of an equation, or in my field, to find the second moment of area of a certain cross-section. Consider questions like, "is there a God", "who was that man in history that called himself the Son of God, Jesus Christ, and was He really God in human form as he claimed to be?" These are pretty big questions aren't they? Well, we feel there is a pretty big and powerful God who cares enough to lead you to the answers.

Come along, join us in the different activities that we have going on throughout the week.

Daily Prayer Meeting:

7:45 - 8:15; 2N 302

Wednesday Meeting:

12:00 - 1:30; 1A 322

- Guest speakers

- Singing

- Sharing and prying

- Bible study

- Fun

- Conversation

- A change from the daily textbook grind

Specials:

To be announced

All are welcome and I would love to see you there.

Executive Co-ordinator

IVCF-BCIT

History of BCIT Clean Air Policy

The process, culminating in the implementation of BCIT's Clean Air Policy on January 1, 1987, has a long history. Prior to 1985, BCIT managers received many complaints about second hand smoke. Around the Institute numerous makeshift attempts to avoid exposure to tobacco smoke were seen. Employees posted nonsmoking signs on their desks in futile attempt to escape the smoke of their neighbouring office mates.

In January 1985 a petition from 30 staff members in 2N418 asked management to designate the office area as nonsmoking. Shortly thereafter, Dr. Barbara Copping, BCIT Medical Services Director, asked the Institute Health and Safety Committee to initiate an Institute smoking policy. From this time to January 1986, health, legal, and economic information was gathered on second hand smoke and smoking policies in the workplace.

An Institute wide committee of smokers, nonsmokers, and exsmokers consisting of interested teaching and support staff, managers, students, medical services staff, and health and safety committee members met on January 15, 1986 - the first meeting of the BCIT Smoking Policy Com-

mittee. Guest speakers from institutions that had already implemented policies (ICBC, Comsum College, and King Edward Campus) attended the first few meetings. Of particular help was Shirley Thompson (BC Lung Association) who provided valuable guidance on the best process to use to ensure optimum results.

In February, Len McNeely, Vice-President of Administration, gave the Committee the "go ahead" to survey all full time Institute staff and a large portion of first year students on their health effects attributed to second hand smoke as well as their preferences for a smoking policy. The surveys' results were published in April, 1986 in the LINK and each staff member received a copy of the staff survey results. The findings showed that 78% of the students and 90% of the staff wanted a formal Institute policy restricting or eliminating smoking at BCIT.

The Committee submitted its report consisting of health, economic, and legal implications of smoking in the workplace as well as a large appendix of supporting data to Len McNeely at the end of April, 1986. To allow smoking staff time to decrease their smoking frequency or to quit their habits, the implementation of the Clean Air Policy was delayed until January 1, 1987.

Bev Alder,
Past Chairperson
BCIT Smoking Policy Committee

Help with orientation appreciated

Thanks to all those who helped to make Orientation Day, Tuesday, September 8, a positive experience for the many

technology and trades students attending BCIT for the first time. From the student tour guides, to the Commissionnaires, to the faculty and staff (especially those who wore a "Ask Me About BCIT" button), to the friendly Registrar's staff, to those who will be forever unknown but courageously stuffed the 'grab bags', thanks!!!! You made the first day of school a more enjoyable time for a lot of people.

As chairperson of the Orientation Committee I would also like to thank those who assisted by serving on the Orientation Committee, Leigh Scheather from the Student Association, Mario Mazziotti, Jeri Fostvelt and Rosa Kajic from the Registrar's office, Lauraine Bailie from Finance, Carol Dion, Special Events Co-ordinator, Stu Gibbs, Counselling, Raelene Rowe and Pat Awarau of Program Advising and Jim Mitchell from Recreation and Athletic Services.

Thanks to all for welcoming students to campus.

Val Karpinsky, Director

Fighting loneliness

- James E. Morrow, R.N. -

As paradoxical as it sounds, a frequent complaint on our big campus is loneliness. Just being here with 12,000

full and part-time students is not itself a guarantee that one will meet people and make friends. Commuter students often feel very lone-

ly - they grew up in Vancouver and 'know the institute' but don't necessarily 'know anyone.' Time spent commuting takes up time that would otherwise be spent socializing.

What's the answer? Taking small risks. First, spend time in places where there are other people - in class, the SAC, games rooms, gym and or Growlies. Next, pick out someone to meet. Remember, the person you pick doesn't have to look like a potential life-long friend or spouse. Only a few people you meet will eventually become friends. Finally, the risk: talk to the person. Generally, what you talk about is of little importance. Keep one thing in mind however. What you say will serve as a model for how the other person is to reply.

If you talk about the weather, so will she or he. If you talk about the last lecture, class, teacher, etc, so will he or she. If you want to know about the other person, you must be willing to reveal something of yourself. If you want to know how someone feels about something, tell them first how you feel about it.

What is the risk? What have you got to lose? Well, the other person could ignore you, or even tell you to get lost (which rarely happens, but is possible). So what? You'll feel rejected and embarrassed for awhile, maybe a whole hour. But you'll recover. And the only hope of winning a friend is by first taking a chance.

- Medical Services

Financial Assistance Available 1987-88

Students experiencing financial difficulties should be aware that they can still apply for the following types of student aid: B.C. Student Assistance (Canada-/B.C. Student Loans & Equalization Payments)

Students who have not yet applied for B.C. Student Assistance can still do so. Those requiring information and assistance in completing the student loan application are invited to attend a BCSAP Workshop. The sessions for Technology students are held every Tuesday and Thursday from 12:30 to 1:30, while the workshops for Trades students are Fridays 1:30 to 2:30. Students wishing to attend one of these sessions can register at the Student Services Reception.

Students who have applied for B.C. Student Assistance earlier but wish to have a reassessment of their award should make an appointment with a Financial Aid Advisor. Appointments can be made at the Student Services Reception.

Work Study Jobs
The Work Study Program provides part-time employment up to 10 hours per week. Wage rates are \$7.50 and \$8.31 per hour. Work Study is a financial aid program and is available only to those students who have applied for B.C. Student Assistance and require more funds than they are receiving in student loans. Available Work Study positions are now posted at the BCIT Canada Employment Centre.

BCIT Bursaries
Bursaries are non-repayable grants that vary between \$100 and \$1000. Applicants must make a good case that they have exhausted all other potential sources of funds and are therefore expected to have applied for B.C. Student Assistance. Technology students must normally have an overall average of not less than 60% in their last term at BCIT to be considered for a Bursary. Trades students must be progressing satisfactorily in their studies.

The deadline for Trades students to apply for Bursaries is

the 29th of each month. For most Technologies, Bursaries are awarded in the spring term. Students can pick up a bursary application in January when they return to campus after Christmas break. In a selected number of Technologies, students can apply for fall term Bursaries. For students in the following programs, applications can be picked up as of October 1 and must be submitted by October 15:

Chemical Sciences (Extractive Metallurgy) - 2nd year, Electronics/Robotics - Levels 2, 4 and 5, Fish, Wildlife and Recreation - 2nd year, Mining - 1st and 2nd year, General Nursing - Terms 2, 4 and 5, Prosthetics and Orthotics - 2nd year, Surveying - 2nd year.

Special Bursary
The Pacific Coast Fishermen's Mutual Marine Insurance Company will be awarding a \$600 Bursary for the 1987-88 academic year. To be eligible to apply, a student must be the son/daughter of a fishing boat owner who insures their vessel with Pacific Coast. Students wishing to apply should obtain an application form from the Student Services Reception and submit it immediately.

The Student Services Reception is in the 1A Building (second floor, northwest corner). Hours are Monday to Friday 8:30 to 4:30. Telephone: 432-8555.

Are You Returning To School

Adult Returning Students Orientation:

- Resources and support services on campus will be presented
- Discuss topics of interest and relevance to returning students
- Meet other mature students on Campus

Date: Thursday, September 24, 12:00 - 1:30 in Building 1A, Room 201.

For additional information contact Howard Peto or Jean Spence at Student Services.

Don Wright, publisher

Get Involved In The Link!

The link is published by the BCIT Student Association, under the direction of S.A. publisher Don Wright. It hits the stands every Wednesday throughout the school year, and is distributed from one end of campus to the other. It receives funding from two sources: advertising, and a grant from the Student Association.

In recognition of the academic demands BCIT places on students, the structure of the

Link is flexible so as to encourage participation by as many students as possible. Regular staff meetings will be held but students are not required to submit material every week to be involved.

Students can participate in the Link in several ways; on a volunteer basis, through a Work Study position, or as a freelance reporter.

Work Study:

The Link has five Work Study positions: four reporters (at 5 hours/week), a news editor (10 hours/week) and an advertising assistant (5 hours/week). Students wishing to apply for one of these positions must qualify for B.C. Student Assistance through BCIT Financial Aid.

Freelance:

To encourage students to spend time researching and writing news stories, the Link pays five cents a published word. This applies primarily to articles that are directly related to some aspect of BCIT or post secondary education. Generally freelance material is assigned, but unsolicited material is always welcome.

Volunteer:

Everything else that appears in the paper is written on a volunteer basis, for example: record, movie and theatre reviews, sports stories, photographs, cartoons,

community coverage and of course letters to the Link. However, the Link does receive records and passes which are distributed to staff wanting to write reviews.

Students need have no previous experience writing or working on a newspaper to get involved in the Link. As well, Broadcast students should note that material written for broadcast can be submitted to the Link.

For more information on getting involved in the Link, contact Don Wright at local 5517 or drop by the Link office, located near the east entrance to the SAC building.

The Publishing Office of the BCIT Student Association requires a part-time typist. Main duty will be to type Link newspaper copy into an IBM compatible computer. Familiarity with MS-DOS, WINDOWS operating environment helpful but not essential. 3 - 6 hours a week after or between classes, Monday afternoon/evening in particular. Rate of pay is \$5.00/hr.

Apply to Don Wright, SA Publishing Office, SAC Building.

Campus Centre

Campus Centre Fundraising has moved into gear and over the coming weeks we will be setting out the various committees and their roles in the campaign.

At orientation, you had the opportunity of seeing the model and architects' drawings of the new Centre. Many of you made the comment 'what good will it be for me, I'll be gone before it opens'. If the students in the 70's had believed that, the squash and racquetball courts would never had been built.

The main thrust of the campaign is aimed at Alumni, asking them to help BCIT, giving something back to the institute that gave them the start in their career. They will have full use of the facilities in the new centre, i.e. meeting rooms, amphitheatre, etc., a place where they can bring their friends and business colleagues, especially useful for those who don't live or work in Burnaby, but need good meeting facilities.

The campaign will have its fun side too, with a team of staff and faculty organizing an on-campus Treasure Hunt. Those of you who like a challenge, or enjoy wrestling with crosswords and puzzles should find this intrigue interesting. The contest is open to everyone on campus, as well as Alumni and will run for approximately 30 months, with grand prizes in May '88, May '89 and at the end. There may also be a few (sur)prizes on the way.

Rules together with the first clue will be published next week in the Link, so keep your eyes open for further information.

The Campus Centre
"Spot the Oddballs"
contest has been
cancelled due to
lack of interest

Beer Garden and Recreation Day

Wednesday, September 16

Bring your team or make one up on the spot!

Watch for the Pacific Skydivers, who
will be parachuting on the back field.

Soccer Cougars Place Second in Challenge Cup

The Fourth Annual Pacific Coast Challenge Cup got under way on Friday, September 11, hosted by Malaspina College of Nanaimo. The prestigious tourney had 8 colleges participating, 4 from Washington State (Spokane College, Green River, Pierce and Bellevue) and 4 from the B.C. Collegiate Athletic Association (BCIT, Capilano, Cariboo and Malaspina).

First round action pitted BCIT Cougars against Bellevue Community College. The game was evenly played for the first few minutes when Yen Fong received a breakaway pass from Cal Traversey and netted his first goal giving the Cougars an early lead. BCIT dominated play and had many scoring opportunities which did not connect. The half ended with BCIT leading 1-0.

In the second half the Cougars once again applied a lot of pressure and were finally rewarded when Yen Fong potted his second goal on a nice pass from Paul Butler. Clive Clarke added an insurance marker late in the game on a fine effort dribbling past one defender then the goalie and finally tucking it away in the right corner. BCIT toppled Bellevue 3-0 earning a solid shut out for Andy Smith and newcomer goalie Marcello Gianna.

Cougars second game was played on Saturday morning against the host team Malaspina Mariners. The fast paced game was evenly played for the first 15 minutes. BCIT began to control the midfield play and scored two goals which the referee called back on offside infringements. In the last minutes of the 1st half Malaspina scored their only goal of the match from a scramble in front of the goal. That's how the half ended.

The second half began with the Cougars controlling the play and failed to connect on many scoring opportunities. BCIT finally got untracked following a missed penalty kick by the Mariners. The next play saw Yen Fong pick up a loan ball at midfield beat one defender and passed to a wide open Neale Teverner who made no mistake notching the first goal and tying the contest. That goal sparked the Cougars who continually pressured the Mariner defence and took the lead on a brilliant header from Dean Mosseau on a rebound from 12 yards out. The Cougars came away with a hard fought 2-1 victory and kept them undefeated in the tourney at 2 wins 0 losses.

The Cougars 3rd game was played Saturday afternoon against the hard working Spokane Community College. The Spokane squad played their best game of the tourney displaying good ball control and a lot of intensity throughout the

match. BCIT scored early on a fine goal by Jim McGovern, however, Spokane never gave up and scored their tying goal near the end of the first half. Spokane continued that momentum in the second half and capitalized on a couple of Cougar errors. The score ended in a 3-1 victory for Spokane who outplayed the Cougars for the first time in the tourney. However, the Cougars qualified for the championship final finishing 1st place in Group A of the tourney. Capilano Blues earned their birth finishing first in their respective Group B.

The stage was set for the Championship Final match featuring the two top teams from B.C. Collegiate Athletic Association. BCIT went into the game nursing many injuries from the previous 3 games in less than 48 hours. Both teams were evenly matched in the first 10 minutes, then Capilano Blues began to apply pressure. The Blues lost one of their key players early in a collision and suffered a fractured collarbone. The match was delayed for 20 minutes while an ambulance was called.

When the game restarted Capilano began to pressure and converted a cross ball to take a 1-0 lead. BCIT then applied pressure to the Blues defence and their efforts were rewarded with a penalty kick, however, the Capilano goalkeeper made a brilliant diving save to retain the lead. The momentum swung to Capilano and soon after they took a 2-0 lead. A freak collision after a whistle mid-way through the first half sent Jim McGovern from BCIT to the hospital with a badly bruised knee. Soon after Yen Fong, who had been a standout in the previous 3 games was injured, on a heavy collision, suffered a hip pointer. The game ended in a 2-0 shut out for Capilano giving them the Pacific Coast Challenge Cup, the first time a Canadian College has won it. BCIT finished a strong second place surprising their competitors on some fine plays and displaying a lot of character after only the first week of tryouts. Congratulations Cougars! Pierce Community College of Tacoma placed 3rd and Malaspina 4th. This was BCIT's first invitation to this elite tournament and the players represented BCIT's Inter-Collegiate Athletic Program in a professional manner.

The Cougars next home game is at Selkirk Community College at Castlegar on the 19th of September and their first home game is Saturday September 26th against the same Capilano Blues at 1:00 p.m. Tryouts are still continuing so if you are interested in participating please contact Carmine Morelli, Soccer Coach at JW Inglis Building, Room 342, local 5240 or at home phone 464-8045.

NOTICE TO STUDENTS OF MANAGEMENT & BUSINESS ADMINISTRATION

Begin building your Solid Base in Management and Business Administration by becoming affiliated with the Canadian Institute of Management. As a student member you can further your Management Skills by:

- attending seminars and workshops offered by the Institute
- receiving your C.I.M. (Certificate In Management) designation — authorized by Federal Charter
- meeting directly with other successful members and potential employers
- attending entertaining and informative monthly Dinner Meetings
- receiving local and national management publications

Thousands of Canadian managers and prospective managers are building their Solid Base by being affiliated with the Canadian Institute of Management.

To receive more information on the Canadian Institute of Management and special student rates, clip out the coupon and mail it to:
